# Introductory

---

The present volume constitutes the 1936 edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social, and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have been proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory, thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

## **THE DEPARTMENT OF MISCELLANEOUS INFORMATION**

THE DEPARTMENT OF MISCELLANEOUS INFORMATION is included in pages 9 to 56 and contains data concerning City, Provincial, and Federal Government offices, commercial organizations, cemeteries, churches (denominational and miscellaneous), colleges and schools, hospitals, homes and asylums, building exchange and associations, institutes and societies, libraries, military organizations, public schools, secret societies, etc.

## **THE STREET AND AVENUE GUIDE**

THE STREET AND AVENUE GUIDE is embraced in pages 57 to 106. In this feature the names of all streets and avenues are arranged alphabetically and numerically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

## **THE ALPHABETICAL DIRECTORY**

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations covers pages 107 to 292.

## **THE CLASSIFIED BUSINESS DIRECTORY**

THE CLASSIFIED BUSINESS DIRECTORY occupies pages 293 to 328 and exhibits the various manufacturing, mercantile, and professional names, compiled under headings appropriate to the class of industry or profession followed.

## **ADVERTISING LETHBRIDGE**

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Lethbridge, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully, The Publishers

HENDERSON DIRECTORIES LIMITED.

September 4th, 1936.

# Lethbridge, Alberta

## AGRICULTURE

The year 1935 will go down in history as one of the driest ever experienced in Southern Alberta, but in spite of this a fair crop of very high quality wheat was produced. Lethbridge railway division produced some 24,000,000 bushels of wheat from plantings of 2,000,000 acres, an average return of twelve bushels per acre. There will be, from the crop, about 22,000,000 bushels for shipment. There had been marketed from the beginning of the new crop year on August 1st last up to December 31st, 19,000,000 bushels, and there were, in elevators in South Alberta on the latter date 10,738,000 bushels of wheat, including more than a million bushels in the government interior storage elevator at Lethbridge which was filled to its capacity.

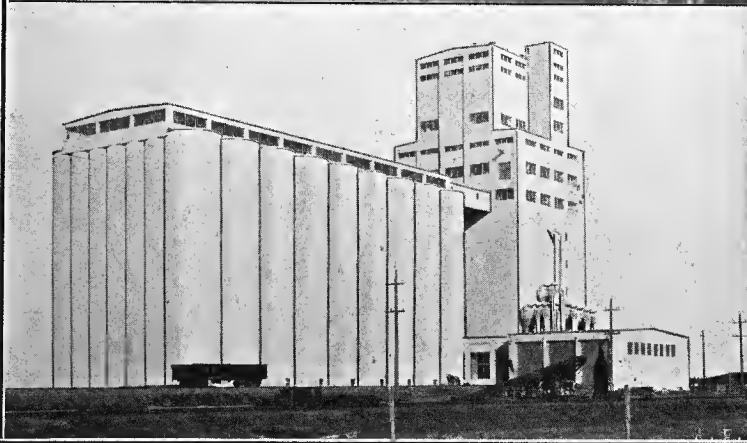

From 1930 up to and including 1935, South Alberta has experienced a somewhat dry cycle, and while crops have been average or less during that period there has not been in any year a crop failure. During those six years more No. 1 hard wheat was shipped from the Lethbridge railway area than in all the previous wheat growing history of this section of Canada. It was no surprise, therefore, that Frelan Wilford of Stavely should, in 1935, win for South Alberta the world's wheat championship at Chicago International show.

In 1934 South Alberta produced an average wheat crop, due in large part to the fact that June of that year brought four inches of rain. In 1935, however, the four growing months brought less rain than fell in June 1934. The precipitation figures reveal the moisture shortage conditions last year:

	33 year av.	1935
May .....	2.37 in.	1.42 in.
June .....	2.81 in.	.35 in.
July .....	1.72 in.	.70 in.
August .....	1.69 in.	1.18 in.
<hr/>		<hr/>
Total .....	8.59 in.	3.65 in.

June, 1935, brought the lowest precipitation for that important crop growing month in the history of South Alberta. The wonder is that any crop at all was raised. When it is known that, in the face of drought of this intensity, the average wheat crop was 12 bushels, it says much for the splendid type of grain farming now almost universal among the farmers of South Alberta. It is proof of timely work in preparation of the soil and the use of good seed. It is the best evidence that the farmers of this part of Canada have benefitted by the hard experience of the drought of 1917-1922.

Seeding was delayed in the spring by the cold, wet weather, but the crop germinated well and had a good start by June 1. Fortunately June, while abnormally dry, was cool, and the crops did not burn and, despite absence of normal rainfall during July and August, the grain ripened normally, being of splendid weight and color.

PUBLIC BUILDINGS AND ELEVATOR

FIFTH STREET SOUTH

Crops were fairly of the 12 bushel average over the whole of Southern Alberta south of the main line of the Canadian Pacific Railway. A section centering on High River suffered an early frost, and cut yields and grades considerably, but as yields there were heavier than in most areas the growers had returns equal to the average over the south.

Unfortunately the good example of 1934 in the growing of oats by early seeding on summerfallow was not carried out on nearly so widespread a scale in 1935, with the result that feed for livestock was not so plentiful. It is essential for permanence of agriculture under climatic conditions which obtain in this area that the growing of oats and fodder crops should be given a somewhat larger place on farms which are now given over almost wholly to wheat.

Despite some shortage of oats and hay, the outlook is that South Alberta has sufficient seed and feed to make the planting of the 1936 wheat crop readily possible. Seed of high quality is available for wheat planting, and there will be some for shipment to other sections of Western Canada where rust and frost will make importation of seed necessary.

A feature of the crop year was that once more Southeastern Alberta came through with colors flying. The technique of grain farming in large areas of the better land in Southeastern Alberta has been learned, and a much steadier farm income is now in evidence there. The rehabilitation of agriculture in that part of South Alberta, after a ten-year period when the future of the area seemed to be greatly in doubt, is of the utmost importance to Lethbridge.

The problem of the development of a farm program which will assist in combating the menace of soil drifting is still being studied in South Alberta. In the spring of 1936 the Act passed at the 1935 session of the Alberta Legislature, making it an offence punishable by heavy fine to allow soil to drift on to a neighbor's farm, will come

A VIEW OF FIFTH STREET

into effect. Just how practicable this law is remains to be seen, but it already has served the purpose of impressing on wheat growers the necessity of adopting a farm program which will prevent soil drifting. Extension of the strip farming method is sure to follow, and the experience of districts where this practice has been universally adopted is such as to indicate that better farm returns will follow general use of the method.

There is nothing to indicate that South Alberta will, in 1936, seed a larger acreage of wheat. The tendency is in the other direction, and with a firming of livestock prices it may be expected that some land will be taken from wheat growing and used for production of coarse grains, pasture and hay crops. Until the overburdening Canadian wheat surplus is cleared away a reduction in wheat acreage would seem to be warranted.

Returns from the 1935 field crops in South Alberta, especially from wheat, were sufficient to enable the large majority of farmers to finance themselves. Wheat prices were from 60 to 65 cents at primary points in South Alberta which, while not encouraging, were not so low as to discourage the industry.

### BEET SUGAR INDUSTRY

The year 1935 will be a landmark in the history of the Beet Sugar Industry in the Province of Alberta, for the reason that after ten years operation with a single factory at Raymond, Alberta, Canadian Sugar Factories, Limited, as the result of an agreement with the Alberta Government, commenced construction of a second factory unit at Picture Butte, Alberta. The new Sugar Factory at Picture Butte is at the present time about 40 per cent completed. The plant will involve a capital expenditure of 1,500,000.00.

As a means of distributing purchasing power in Alberta, this factory unit will be an outstanding achievement for the years 1935 and 1936.

GALT PARK

The Sugar Company decided as a matter of policy to build a completely new factory, fully modern and up-to-date and to use as far as possible, materials originating in the Province of Alberta. In pursuance of this policy, the plant has used local sand and gravel; cement from Exshaw; brick and tile from Medicine Hat; lumber from Alberta mills, and a very large proportion of the factory machinery, structural steel, etc., has been and is being fabricated in Calgary, Alberta.

There will be an average of approximately 150 men employed during the construction period, representing all classes of tradesmen and mechanics, and at the peak of construction during the summer, there will be approximately 250 men employed.

The plant is designed to slice a minimum of 1,000 tons of sugar beets per day, and it is expected that there will be an initial run of approximately 80,000 tons.

The Beet Sugar Industry has become in ten years one of the major industries of this Province. The peak of production was reached in 1934, when due to an exceptionally favorable growing season, the crop averaged 12.4 tons of beets per acre, with a total sugar production of around 53,000,000 pounds. While the same acreage was planted to sugar beets in 1935 as in 1934, climatic and seasonal conditions were not so favorable. The spring season opened much later, and the entire growing season for sugar beets was approximately three weeks less. The tonnage per acre for 1935 was practically 10 tons per acre, to be exact 9.96. The total yield of beets was 138,809 tons. The quality of sugar beets in 1935 was above the average for this Province, practically 18% sugar, the exact figure being 17.98 sugar content.

The Sugar industry of the world is still suffering from extremely low prices, and as the Dominion of Canada imports around 85% of its sugar consumption, prices in Canada are affected by the low

prices of sugar in the world generally. Because of this condition Canadian consumers are purchasing sugar at the lowest prices ever known. It is estimated that the farmer's price per ton for the 1935 crop will be \$5.85; of this amount \$5.25 has already been paid to the farmer.

During the sugar beet operating season there are approximately 800 farmers, 1200 farm laborers and 350 Sugar Company employees engaged in the processes of harvesting and storing the beets and refining the sugar. The Sugar Company will pay for the 1935 crop approximately \$900,000.00 to the farmers, \$150,000.00 for freights, \$250,000.00 for materials used, and approximately \$225,000.00 for salaries and wages.

### **IRRIGATION**

Once again that erratic, fictitious personality, commonly known as the weather man, in open defiance of the almanacs, the Indians and the rheumatic toe of the oldest resident played on us this year one of those tricks of his which so upset the calculations of the farmer.

After giving us an unusually wet spring, in fact so wet that the usual April seeding had to be postponed until May, and leading us to believe that we were going to have a wet season, he apparently changed his mind and gave us an unusually dry May followed by the driest June in thirty-two years. While July and August were also unusually dry months, the effect of this drought was not so apparent in the immediate vicinity of this city, which is fortunately surrounded by some 200,000 acres of irrigated land, as on the dry land outside the irrigated territory, very little feed for stock was grown outside the irrigated districts. It is years like this which emphasize the value of small irrigated tracts for the stockmen. The Federal Government realizes this fact and under the Rehabilitation Act is assisting the stockmen on the Prairies of Southern Alberta and Saskatchewan to conserve the spring run-off and develop small inexpensive irrigated tracts for the growth of winter feed.

Sugar beet growing, which is exclusively an irrigated crop, is now well established in this community, the factory at Raymond having been in operation since 1925 and the efforts of this Board in assisting the farmers to extend this territory have resulted in the present company deciding to build another factory at Picture Butte, in the Lethbridge Northern Irrigation District, which will increase the acreage under this crop by some 14,000 or 15,000 acres. This factory is well under way and will be ready for next season's crop.

### **Lethbridge Northern Project**

This project was organized under the Irrigation Districts Act of Alberta, and is located on the northerly side of the Old Man River, from which it gets its water supply. It has been operating about eleven years as a co-operative project owned and operated by the farmers under it. Some years ago an Official Trustee was appointed by the Provincial Government and the project is still operating under his supervision. Within the boundaries of this District are several smaller towns and a number of coal mines. There are about 105,000 acres of irrigated land on which there are now located about 800 settlers but it is not yet entirely colonized. There is still some excellent land available.

During 1935 this project produced higher average crop returns than they have for several years. The new Sugar Factory is under construction and some additional five thousand acres of land have been prepared for beets for 1936.

A start was made in growing commercial peas and beans. Some of the yields were very satisfactory. A contract for 2500 acres of these crops is available for 1936. The raising of these specialized crops is another means of spreading the farming risks and if a good market is obtained it should provide a new source of revenue for the project settlers.

There has been an increase in the livestock in the District, particularly horses and hogs.

#### **Alberta Railway & Irrigation Company Project**

This project is located south and east of the Old Man River and east of the St. Mary River, adjoining this city. The gross irrigable area receiving water under this project is about 120,000 acres. It is owned and operated by the Canadian Pacific Railway Company and is about 35 years old. There are about 1000 water users on the project. This does not, however, include the farmers on the three co-operative projects included in this system. These are the Taber Irrigation District, the Raymond Irrigation District, and the Magrath Irrigation District, all of which were organized under the Irrigation Districts Act of Alberta and receive their water supply from this project. This project is a well settled, prosperous community.

#### **Raymond and Magrath Irrigation Districts**

These are co-operative projects owned and operated by the farmers under them. The Raymond project consists of about 6500 acres of irrigable land within the boundaries of which is located the thriving town of Raymond with its Sugar Factory. The Magrath District contains about 5000 acres of irrigable land which includes the town of Magrath, which has its own water and sewer system.

#### **Taber Irrigation District**

This project is located about 30 miles east of this city. It is owned and operated by the farmers and comprises 21,600 acres of irrigable land. The irrigation water is supplied from the A. R. & I. project in bulk at their headgates. It is a thrifty, prosperous community which has been in operation about 15 years.

The net bonded debt of this district is about \$11.30 per acre and the annual assessment for all purposes last year was \$2.10 per acre.

The local canning factory turned out 130 car loads of canned goods this year, consisting of peas, string beans, corn, pumpkin and pork and beans. This crop was grown on 1100 acres with 400 acres additional for growing seed peas.

There were about 4000 acres in sugar beets again this year. On account of the unfortunate weather conditions the second year's experiment with the raising of broom corn was not as successful as the first year. Three hundred and fifty acres were planted; the total yield being about 100 tons. Local interests are investigating the possibility of financing a small factory for the manufacturing of brooms.

### **Canada Land and Irrigation Company Limited**

This project of the Canada Land and Irrigation Company Ltd., situated about 60 miles east and north of Lethbridge, with Vauxhall as its commercial centre, has enjoyed a good year. The yield of wheat per acre in 1935 is the largest since 1929, and the increase in price for this commodity, although still relatively low, has aided the farmers of the project. The large number of livestock which are in the district and the adjoining stock leases are providing a substantial market for coarse grains and hay.

Twenty-five new applications for purchase of land were accepted, bringing the total number of farmers in the district in excess of any previous number. The number of prospective settlers who have visited the project leads us to believe that there will be a continued development of sales.

### **New West Irrigation District**

This is a small co-operative project of about 4500 acres, owned and operated by the resident farmers, under the supervision of an Official Trustee appointed by the Provincial Government. It adjoins the Canada Land and Irrigation Company project from which it gets its water supply.

Owing to a very wet spring, wheat seeding was not completed until early June. About the middle of the month the weather turned extremely hot and dry, and remained so during July and most of August. By the 15th of June their laterals were carrying peak loads.

Although the hot, dry weather was very hard on growing crops, their wheat yield average per acre (19.75 bushels) has been the best since 1927.

Owners of sheep flocks sustained heavy losses during the lambing season. Their average lamb production was only about 60% whereas in 1934 the average was better than 125%.

The principal crops grown are wheat, coarse grains, alfalfa and alfalfa seed.

### **United Irrigation District**

Comprises about 35,000 acres near Cardston. It has an ample water supply from the Belly River. It is a co-operative project owned and operated by the farmers under it.

The principal crops are grain, root crops, and hay.

The project also supports a livestock and poultry industry.

It is operating under the supervision of an Official Trustee. Their headquarters are at Glenwoodville, Alberta.

### **LIVESTOCK**

Livestock producers in the Lethbridge and surrounding districts have enjoyed one of the most prosperous years since 1929. The volume of livestock has increased, the quality improved, and better prices have been received.

The movement of livestock through the Lethbridge stock yards shows an increase in volume of 20% over that of 1934. The increase in valuation is 67.41% over that of 1934.

The following are comparative figures in number of head and valuation over a five year period:

	1931	1932	1933	1934	1935
Hogs .....	59,129	54,155	45,712	45,188	53,963
Sheep .....	37,403	22,817	18,764	16,791	17,368
Cattle .....	6,490	5,089	4,086	3,525	11,499
Horses .....	991	545	567	1,045	1,227
	<hr/> 103,513	<hr/> 82,606	<hr/> 69,129	<hr/> 66,549	<hr/> 84,057
Value					
Hogs .....	\$615,290	\$270,775	\$457,120	\$587,444	\$771,719
Sheep .....	187,015	45,634	93,820	67,164	69,452
Cattle .....	238,420	32,450	92,100	105,750	459,960
Horses .....	14,730	7,000	16,920	41,800	41,800
	<hr/> \$1,055,455	<hr/> \$355,850	<hr/> \$659,960	<hr/> \$802,158	<hr/> \$1,342,931

It is to be noted that the valuation of the 1934 volume reached close to one million and a half dollars, which no doubt has added considerably to the prosperity prevailing in Lethbridge and Southern Alberta generally.

There has been a decided increase in the number of head of livestock of all classes put into the feed lots for finishing in the irrigated areas, thus utilizing to the full beet by-products, alfalfa hay and coarse grains. With the increasing volume of livestock being fed in the Lethbridge district, this district will shortly be Canada's outstanding feeding area.

Better prices during the past year may be credited to all classes of livestock, and particularly that of cattle. With a demand for good beef cattle in the United States last March it was decided by the feeders in this district to ship finished cattle to the St. Paul and Chicago markets, paying duty and freight charges. The result was a handsome profit to the feeders. This has resulted in more cattle being placed in the irrigated areas for finishing.

The volume of hogs shipped from the Lethbridge district in 1935 shows a marked increase over that of 1934, and with a steady market price established throughout the year, proved to be a profitable venture to the producers.

Considerable improvement has also been noted in the quality of hogs being produced. In this respect the Lethbridge district is now considered equal to that of any district in Western Canada, and is exceeded in quality by only a small margin by the old province of Ontario.

The average price for hogs received during 1935 was \$6.65 per cwt. basis bacon, the price ranging from \$6.00 to \$8.25 throughout the various months of the year.

Like hogs and cattle, the sheep industry showed a marked improvement in prices. This applied to wool as well as mutton. And while it is true that due to the late spring of 1935 a much lighter lamb crop was produced in South Alberta, yet with the increased prices received, the sheep owners generally did better than during any of the past five years, where heavier lamb crops were produced.

The new lamb crop of 1935 sold at prices varying from \$6.00 on new lambs to \$4.50 on feeders, up to \$7.00 on feed lot lambs.

During 1935 pastures on our range areas suffered considerably from drought, although there was plenty of moisture early in the spring, resulting in a fair average crop of fodder being produced. Therefore stock went into the winter months in good condition. With a larger amount of coarse grains produced in our irrigated areas, together with alfalfa hay, and a larger number of livestock being put into the feed lots everything points to a successful year in the livestock industry for 1936.

## **JUNIOR FARMERS' ACTIVITIES**

### **Livestock Clubs**

Three outstanding Junior Farmers' Live Stock Clubs operated during the past year.

The Dairy Calf Club held its Ninth Annual Competition at the Lethbridge Exhibition, some fifty entries being exhibited, comprising junior calves, yearlings, and two-year-old heifers. The yearlings were shown as calves the previous year, and are cared for by the Club members until they have passed their first lactation period. Club heifers have produced as high as 11,000 pounds of milk, and over 400 pounds of butterfat, during their first lactation period, and consistently are awarded prizes in exhibition against entries of adult competitors.

The highest dairy calf award went this year to Bert Parry, Lethbridge, with Joan Webb, Lethbridge, runner-up. These animals also headed their section in the pen classes.

The Beef Calf Feeding Club held its eleventh annual competition at the Lethbridge Exhibition, with twenty-seven entries composed of seventeen Herefords, eight Aberdeen Angus, and two Shorthorns. Premier award was made to Frank Smith of Iron Springs, with a splendidly finished Aberdeen Angus; Robert Bathgate of Diamond City came second, also with an Aberdeen Angus, while third placing was awarded Joe Kovich, Lethbridge, with a Hereford.

Peter LaValley again donated his services as auctioneer, the top prices he received being 22½¢ per pound live weight, paid by the T. Eaton Company Ltd., for the first prize animal. The average price received showed some improvement over that for the previous year, and the thanks of the Directors are again extended to the following buyers who supported the bidding for these choice animals: Burns & Co. Ltd., Crighton Meat Market, T. Eaton Co. Ltd., Ellison Milling & Elevator Co., Ltd., Independent Meat Market, W. H. McIntyre of Magrath, Magrath Meat Market, Marquis Hotel Co. Ltd., Picture Butte Red & White Store, and Supina Mercantile.

The Swine Clubs of the district held a splendid showing of twenty-three entries, each entry consisting of a pen of two bacon hogs. This showing took place at the Exhibition, and is an intermediate showing, the final exhibiting taking place in the Fall. First award was taken by Doris Webb, Lethbridge, Verna Snowden, Lethbridge, being second, and Herbert Williams, Taber, being third. Mr. Ivan Garrison, of the Federal Department of Agriculture, has supervision of these Junior Swine Clubs, and excellent progress is being made.

In addition to exhibiting animals raised by themselves, the members participated in various judging competitions conducted on the grounds during the Exhibition, and marked abilities were shown by the young competitors.

The Lethbridge Exhibition Board provided classes and prize money for all Club entries, as well as granting certain other concessions to the members. The various Breed Associations also provided special additional awards. In this financing the Exhibition Board was materially assisted by the Federal Department of Agriculture, and by the following, to whom appreciation is again recorded: The Advance Lumber Co. Ltd., Senator W. A. Buchanan, Burns & Co. Ltd., Calgary, Canadian Sugar Factories Ltd., Consumers Hardware Ltd., Mr. Chris Hansen, Hoyt Hardware Ltd., W. T. Hill & Co., Lethbridge Kiwanis Club, Southern Alberta Co-operative Association, and Lethbridge Teco Store.

There is no doubt whatever that the activities of these Junior Farmers' Livestock Clubs are not only having a very favorable effect on the young participants themselves, but also upon the many adult farmers who have become interested in their work. Slowly perhaps, but certainly, more of the better type, higher class animals are filtering into our territory, and more up-to-date practices in regard to livestock breeding and raising are being effected, in part reflecting a definite contribution of the Junior Livestock Clubs.

## DAIRYING

The production for the Creameries within a 50-mile radius of Lethbridge was 999,114 pounds of butter, as compared with 1,149,561 pounds in 1934, a decrease of 13.4 percent. This decrease is chiefly accounted for by the late spring and dry summer, which resulted in poor pasture all through the season. The long period of low prices has not been encouraging to producers. While the tendency has been toward higher prices, there has not been sufficient increase to encourage production on a large scale.

Usually dairying is the main branch of agriculture in an irrigated district and it is interesting to note that most of the butterfat produced in the Lethbridge district is produced on the dry land. We have a large area under irrigation, very suitable for dairying, and no doubt when these farmers become properly established, dairying will be one of their main branches of production, instead of a side line as at present.

Dairying is the third largest branch of agriculture in Canada and is looked on as the greatest source of current cash from the farms. The actual cash received from cream is only part of the

income from a dairy herd. The increase of the herd, the fertilizer and the value of the skim milk for feeding purposes all add materially to the income from a good dairy herd.

While at present we are only producing a small percentage of the province's production, it is generally believed that when butter prices come back to normal, that with our large area of fertile irrigated land, this district will be one of the largest producers of butter-fat in Alberta.

The butter production for the province for 1935 was around 23,225,000 pounds compared with 25,061,447 pounds in 1934—a decrease of 9.3 percent. The increase in price of butter over previous years make the revenue for 1935 about equal to that of 1934, so that while there is a decrease in production the value to the producer is about the same. We have estimated the selling value of the creamery butter for the province at about 19.7c compared with 18.8c for the previous year.

The cheese production for the province in 1935 is about 1,350,000 pounds compared with 1,370,000 for 1934. The average price of cheese for 1935 will be about 12c per pound while that of 1934 averaged about 11¼c.

## POULTRY

The year 1935 was one of steady improvement in the poultry industry. The upward trend in egg prices begun in 1934 continued in 1935 and, inasmuch as the number of eggs in storage is low, and, in Western Canada particularly, the number of birds on farms is below normal, there is good reason to believe that the level of egg prices reached in 1935 may be maintained in 1936.

Prices for dressed poultry in 1935 were substantially higher than those received in 1934, and with improving business conditions in Canada, it is expected that there will be a somewhat greater domestic demand for poultry meats during 1936. Further, there is considerable promise of a profitable outlet for Canadian poultry meat products on the British market, and the recent reduction in the United States tariff may also permit of some export to that country. In this connection a concerted effort is being made to emphasize the importance of breeding for improved meat type, a point which has been neglected somewhat in the effort to increase egg production.

An abnormally light turkey crop in 1935 assisted in the advancement of turkey prices to a level well beyond that of 1934, and as turkey holdings were below normal at the end of the past year, the outlook for 1936 is quite favorable.

It is encouraging to note that improved market conditions have been accompanied by increased interest in better methods of breeding, feeding and management on the part of poultrymen in the Lethbridge district.

## HONEY

The season of 1935 was not especially good for the honey crop in Southern Alberta. The total production for the district south of Calgary was about 825,000 pounds, which was only three-fourths as

much as the yield of the previous year. The quality was up to its usual high standard and prices were slightly better than they were in 1934, the producers having received about eight cents for their product.

There was a decided impetus to the importation of package bees, twice as many packages having been imported into the province as in any previous year. The total value of package bees brought into the province during the last four years was:

1932 .....	\$10,508.00
1933 .....	\$12,473.00
1934 .....	\$10,226.00
1935 .....	\$20,660.00

### MINING

It is with decided regret we view the 1935 mining operations, as in that period this district experienced a disaster that will long be remembered. On December 9th an explosion took place in the Coalhurst mine, resulting in the death of sixteen workmen. Our sympathy goes out to all affected.

The output of this district shows a slight increase over the previous year, but as December figures are not yet available, the exact increase cannot yet be determined. At the end of November the output from this field was 320,109 tons against 276,337 tons for the corresponding period of 1934, an increase of 15.8%, while the entire domestic output of the province showed an increase of 13%.

With the closing down of Galt Mine No. 6, the output of the Cadillac Mine at Shaughnessy was increased to take care of requirements. Steady progress has been made on the new operation west of the river, known as Galt No. 8, and it is expected it will commence producing about the end of February. This will be one of the most up-to-date mines in Canada, and it is confidently anticipated, with the improved coal preparation, which will likewise be extended to the Cadillac Mine at Shaughnessy during the incoming summer, that decided gains will be made in recovering the market.

All indications point to the lowest level in marketing having been passed, and we look forward with confidence to a steadily increasing market and more prosperous times.

### MILLING

The evolution of milling has kept pace with the march of time and this indispensable industry points with pride to its accomplishments. The modern mill today is the product of the industry's best minds.

The Ellison Mill, located at Lethbridge, is one of the most modern plants, including its machinery and processes of milling. The plant itself has been said by experts to be the best balanced mill in Western Canada. Its products are known far and wide as being unexcelled in quality. Every product of its manufacture has the seal of approval of the most up-to-date methods and tests of science.

Skill is used through laboratory tests in selecting the best wheat for milling purposes. The wheat is thoroughly washed, brushed and scoured before it goes through the many processes of grinding, separating and maturing.

The mill itself has a capacity of approximately 1,000 barrels a day and since the new crop year of 1935, has operated almost continuously day and night, principally for domestic use in the western provinces and for export to the world markets.

The company employs 30 to 35 employees the year round in Lethbridge and has a payroll covering its entire system of approximately \$100,000 annually. The company owns its own line of elevators in Southern Alberta.

The local mill operates an up-to-date feed plant and supplies all kinds of feed for either stock or poultry. All mill feeds such as bran and shorts are sold and consumed on the domestic market.

On account of the very dry season, the wheat crop was not as heavy in 1935 as it has been in previous years, but the quality from a milling standpoint is just as good, or perhaps better.

Flour prices held fairly steady throughout the year, but the export market was hard to reach as Canadian wheat prices were pegged by the government, making them higher than the world prices.

### **ALFALFA MILLING**

Alfalfa meal is truly vitamized with sunshine. Nature seems to be in league to produce a superfine product. In these irrigated areas of Alberta prairie the dry, crisp air and energizing rays of the sun conspire with the elements of soil and nourishing mountain waters, flushing the alfalfa plant with a store of those rich body and bone building vitamins that make it so valuable as a complement of animal and poultry mixtures.

An average of 295 hours of bright sunshine were recorded in Lethbridge during each of the growing months of 1934 and 1935.

Alfalfa meal made from well cured, sunned alfalfa, grown in Southern Alberta's irrigated areas, is a pure, wholesome and highly nutritious animal feed. It combines readily with other ground ingredients and adds materially to the feeding value of any animal or poultry food.

Not only because of its appetizing flavor, rich color and inviting fragrance is it a valuable component of feeding mixtures, but the chief value lies in its high calcium content, adequate proportion of protein, its slightly laxative effect, and the distinctive values of the vitamins, all five of which are present in high quality alfalfa meal.

Twenty-five hundred tons was the output milled by the Geo. W. Green & Co. Ltd. mill at Lethbridge in 1935.

Alfalasses is also an exceptional feed combining the desirable elements of chopped alfalfa blended with a suitable percentage of pure beet molasses, both being products of the prairies of Southern Alberta.

### **BUILDING**

During the year 1935 there were one hundred and sixty-two (162) building permits issued by the City totalling \$118,442.00, compared with one hundred and ten (110) in 1934 totalling \$70,100.00.

The classification of the 1935 permits is as follows:

3 Fully modern duplex residences .....	\$14,575.00
13 Fully modern single residences .....	37,675.00
4 Residences changed from single to duplex .....	3,135.00
18 Alterations to residences moved into city .....	8,785.00
Repairs and alterations to residences .....	14,475.00
4 Shacks—semi-modern .....	1,020.00
Addition to residences .....	6,100.00
21 Private garages .....	2,995.00
Additions and alterations to business buildings .....	10,100.00
Addition to Tourist Camp buildings .....	2,500.00
Addition to Marquis Hotel for Coffee Shop .....	4,600.00
Alterations and repairs to First Baptist Church .....	3,000.00
1 New store (brick building) on 6th St. ....	6,500.00
1 New Service Station .....	3,000.00
<b>TOTAL .....</b>	<b>\$118,442.00</b>

### OIL AND GAS

The year 1935 brought important developments in the oil industry in Southern Alberta, the last month of the year bringing a discovery of crude oil in the Terminal Oil Company's well in the Del Bonita field, 45 miles south of Lethbridge near the border. The production of the well has not been determined but it is hoped it will be developed into a commercial producer. However, the discovery of light crude oil of 34 gravity baume or better is of major importance and is expected to result in important development.

Soon after the strike at Del Bonita came tidings of a strike of crude oil at the Weymarn well west of Pincher Creek in the foothills district, one of the early fields explored for oil in Alberta. The final results at this interesting wildcat are also awaited.

No further progress has been made in the Taber field where another well was projected by Toronto interests early in the year. The derrick was erected but no drilling done. To the west in the foothills area, the Watson structure near Lundbreck has three wells drilling, one of which, Marjon No. 3, has oil and gas shows. In Waterton National Park at Oil City, scene of pioneer oil development in Alberta, another well is down some 2,400 feet and drilling. In the southeast, the Comrey well is slowly going down testing an important structure. Franco Oils are operating in the Cardston field and plan to go ahead with a development program next year.

Red Coulee wells have continued producing substantial quantities of crude oil on the pump during the year as the figures below will reveal. Although yields are lower the wells are still good for some years, it is thought. No new wells were drilled in Red Coulee during the year. Refiners at Coutts continued operations during the year utilizing crude from border fields.

Re-pressuring of gas wells in the old Bow Island field continues by the Canadian Western Natural Gas Company and on December 1 a total of seven billion 774 million cubic feet of waste Turner Valley gas had been piped to Bow Island and re-stored in the earth as a reserve. The re-pressuring of these wells will continue indefinitely. The original gas content of the Bow Island field was 46 billion feet.

Production of oil in Alberta for the eleven months ending November 1 was 1,153,632 barrels. Red Coulee produced 19,063 barrels of light crude, and Skiff, 1,564 barrels of heavy crude. Red Coulee figures in barrels for the eleven months of 1935 as compared with those for the previous year follow:

	1934	1935
January .....	2,047	1,633
February .....	1,684	1,425
March .....	1,975	2,178
April .....	2,080	2,046
May .....	2,032	1,901
June .....	1,682	1,716
July .....	1,798	1,660
August .....	1,531	1,794
September .....	1,391	1,689
October .....	1,302	1,562
November .....	1,765	1,459
December .....	1,701	
Total .....	22,956	19,063

### AUTOMOBILES AND TOURISTS

It is generally agreed that the production, sale and use of motor vehicles is a fairly accurate measure of financial conditions. The manufacture of both passenger autos and trucks reached its peak in Canada during 1929, but registrations of the same did not reach its highest point until 1930. All three of these items continued to drop for the succeeding three years. Then in 1933 the number and the value of autos and trucks manufactured showed a small increase and in 1934 registrations were slightly up. It has just been announced that a further increase of 4% in registrations in all Canada occurred during 1935, while the registrations in Alberta for 1935 increased by 5% over those of 1934,—the total licenses issued in Lethbridge being 5,452. In view of this it is quite remarkable that the increase in sales of new autos and trucks in Lethbridge increased over 40% during 1935.

Every incoming tourist is a valuable source of cash revenue to the district visited. Official records indicate that fully 80 per cent. of all tourist travel in Canada is now by automobile. An urge for constant change of scene and for continuous movement seems to have taken deep root in the tourist. Most people now spend their vacations touring about the country in privately owned autos, sleeping in one place one night and in another place from one to four hundred miles distant the next night; and so on during their entire holiday.

It is not possible to find out the number of tourists visiting here last year. Many just "pass through" on their trip, many others stop at our hotels. But hotel registers do not indicate which of their patrons are tourists and which are ordinary travellers. However, the registrations at the Lethbridge Auto Tourist Camp give a reasonably accurate idea of the tourist traffic. 1,220 autos carrying 4,189 tourists registered there in 1935 while 896 autos and 2,924 tourists stayed there in 1934. This indicates an increase of 36 percent in cars and 43 percent in tourists.

Another accurate indication of the number of visiting tourists is in the registration at the customs and immigration ports of entry at Coutts and Carway. During 1935—autos in the number of 34,217 carrying 83,026 passengers entered Alberta at Coutts and 8,563 autos with 30,860 passengers entered at Carway. This is a total increase for the two ports of 14.6% in autos and 33.6% in passengers over the figures of 1934.

Many tourists visiting this district enter Canada through ports in Southeastern British Columbia, viz., Newgate and Roosville (south of Elko), Kingsgate (south of Cranbrook) and Rykerts (south of Creston). Total entries through these ports during 1935 indicate an approximate increase of 16 percent in vehicles and 22 percent in passengers.

Very gratifying increases are shown in registrations at Waterton National Park. These include increases of 24½ percent in autos and 31 percent in tourists—the latter including a very pleasing gain of over 44 percent in American tourists.

That a clearer picture of these items may present itself we summarize:

Item	1934	1935	Increase
1. New car sales in Lethbridge .....			40 %
2. Registrations			
(a) Lethbridge Auto Camp

Insofar as the above indicates a returning tide of prosperity, it is very gratifying indeed.

The only new highway construction completed in this district during 1935 was what has been known as the Belly River-Kennedy Creek Cut Off, stretching from the bridge over Waterton River in the Park for fourteen miles southeast to Chief Mountain port of entry on the American boundary where it connects with the new American

highway following Kennedy Creek to U.S. No. 89 about four miles north of Babb, Montana. It is estimated that this new route will very largely increase the traffic between Glacier and Waterton National Parks.

All primary highways as well as the city streets have been fairly well maintained during 1935; but the long spell of dry weather and the increased traffic very materially increased the danger arising from dust menace. It is now generally agreed that all main highways must become hard surfaced and dust free as soon as ever possible.

An up-to-date community kitchen, showers, toilets and several new cabins were built at the Lethbridge Tourist Camp in 1935. Situated as this is, within the Park on the bank of Henderson Lake, it is now one of the most attractive tourist camps in the province. It continues under the management of Mr. George Cropley and is a very definite asset to Lethbridge.

Waterton Lakes Park continues to be improved. A new administration building is in course of erection. In addition to several new cottages, buildings completed during 1935 at Waterton Park include a new wing on the government garage, a ladies' dressing room at Lake Linnet, a new rest room at the tennis courts and a shelter and lounge at Cameron Lake. Improvements have also been made in the golf course and the main highway between Pass Creek and Waterton bridge has been widened.

### WHOLESALE

The year 1935 may be generally regarded as marking a definite improvement in the majority of commercial activities. Wholesale business during the year was indicative of this improvement, which, although varying in degree as between different classes of wholesale trade, did not by any means measure up to the peak of business established during the past decade. However, an increased demand, and an added financial capacity to satisfy it, coupled with a moderate firming up on market prices created a comparatively favorable wholesale situation.

Several factors were responsible for bringing this about, chief among which was the establishment by the Federal government of pegged wheat prices. This naturally had a marked effect on rural distribution. The advance in the cattle market also contributed appreciable revenue for trade purposes. Due to a widely spread, though possibly temporary agitation for systems of price control, certain staple commodities, mostly manufactured outside of the province, maintained a fairly firm market, while an increasing number of products are sold on a price basis specified by the manufacturers.

Lethbridge is fortunate in having representatives of every class of wholesale distribution, carrying complete stocks of all the better known products embracing wearing apparel, machinery and farm implements, oils, lumber and building materials, groceries, foodstuffs, fruit, harness and leather goods. Reputable firms employing permanent staffs, established in up-to-date warehouses serve Southern Alberta with the products of all parts of the world. Increasing volume of importations from other parts of the Empire indicate that

the products in question have become firmly established on this market. A large volume of business is transacted with our neighbors to the south, providing the largest part of the local customs revenue. It can truly be said that the markets of the world are tapped to bring a service to the business and social life of the community second to none in the west. In spite of certain disturbing elements, e.g., the Italo-Ethiopian dispute, the Chinese situation and the fluctuations of silver exchange, sustained efforts are made to maintain as staple a price basis as possible—one of the requisites of good trading.

It is, of course, natural that some products should receive unstinted support from local wholesalers. Beet sugar manufactured at Raymond enjoys a decided preference, as in the various phases of its manufacture a most valuable contribution is made to local industry and agriculture. The establishment of a second factory at Picture Butte is viewed with satisfaction by the wholesale organizations. Taber, too, is becoming widely and favorably known in this and contiguous territories. Canned goods packed there being of high quality, find a ready sale, and due to increased production and a wider range of varieties, this promises to become a substantial canning industry, operating in the Lethbridge district utilizing Lethbridge district products. Local wholesalers play an important part in the distribution of such products, and willingly assist to that end.

The operation of wholesale distributing warehouses entails the use of permanent staffs supplementing the regular payrolls of the city. It also assists in supporting other services, railway, postal, garage, hotel, etc., thus filling an important part in those multifarious operations known in composite as "Trade."

## **Civic Administration**

### **CIVIC OFFICIALS**

Mayor—D. H. Elton, K.C.

Manager—J. T. Watson

## Henderson's Lethbridge Street and Avenue Directory 1936

First Ave. (N.)      HENDERSON'S (1936) LETHBRIDGE      First Ave. (S.) 57

### NOTICE

◆ The Symbol following the residence name, indicates that to the best of our knowledge someone living in the house is the owner.

✱ This Symbol indicates that a telephone is located at this number on the street.

This new Home Owners, Tenants and Phone Directory is compiled from information taken on a special house-to-house personal canvass. We do not guarantee to be absolutely correct in every detail, but we believe it to be very accurate and complete, as far as it has been possible for us to get the information personally from someone at each residence. Where occupants have been absent the "owner" information has been left out.

### FIRST AVENUE (North)

Runs from Fifteenth Street north-east to city limits.

#### Odd numbers north side

1301 Stacey Lumber Co Ltd  
1311 Peters Walter L
